New Employee Handbook

What to do if: You encounter Pirates and or Ninjas

If you encounter menacing Pirates or Ninjas, or in the event that both attack at the same time remember these steps.

For Pirates:

1. Draw broadsword, take a defensive stance, usually they will fire a shot the first chance they get. Crouch and hide as much of your body as you can behind your shield, once you hear the shot, or shots in the case of multiple pirates, move onto next step.

2. Once you are in the clear from gunfire, throw shield at pirate(s) and draw axe, it will take minutes for them to reload their guns, so it will be hand to hand from this point on.

3. Remember your training, as you rush at them cry the All Father's name for added intimidation and stamina. Keep your feet shoulder width apart, and give e'm Hel. (Now that you are a Viking you refer to the underworld with one less "l")

For Ninjas:

1. Draw broadsword, take a defensive stance, usually they will throw several shuriken the first chance they get. Crouch and hide as much of your body as you can behind your shield, once you feel them hit your shield, move onto next step.

2. Once you are in the clear from the shuriken, throw shield at ninja(s) and draw axe, Ninjas usually throw all they have, so you should be in the clear from more shuriken.

3. Remember your training, as you rush at them cry the All Father's name for added intimidation and stamina. Keep your feet shoulder width apart, and give 'em Hel. (Now that you are a Viking you refer to the underworld with one less "l")

For Both:

Follow above steps in conjunction.
